

Sanket Potdar

Full-stack Web Developer

+91-8308003869 sanket.potdar563@gmail.com LinkedIn GitHub Portfolio Bangalore, India

PROFILE

Front-end-focused full-stack web developer with 2.8+ years of experience building enterprise-scale web applications using React.js, Node.js, GraphQL, PostgreSQL, and AWS Serverless technologies. Experienced in designing reusable frontend architectures, developing cloud-native backend services, integrating third-party systems, and delivering solutions for global organizations, including Honeywell and Paramount Global.

TECHNICAL SKILLS

React.js | Next.js | Redux | Tailwind | Storybook | Jest | JavaScript (ES6+) | TypeScript | HTML5 | CSS3 | Responsive Web Design | Mobile-First Development | Node.js | Express.js | RESTful APIs | Git | GitHub Actions | Jira | CI-CD | PostgreSQL | GraphQL | MongoDB | AWS Lambda | AWS RDS | EventBridge | Serverless Framework | Agile Framework | Webhooks

PROFESSIONAL EXPERIENCE

Full-stack Web Developer Jul 2026 – Present
i-exceed Technology Solutions Private Limited

- Developed enterprise-scale web applications utilizing **JS**, **jQuery**, and **Oracle DB**, ensuring high performance and responsiveness.
- Designed and implemented reusable frontend architectures to enhance user experience and streamline development processes.
- Integrated third-party systems to provide comprehensive solutions for global clients, including renowned financial institutions.

Full-stack Web Developer Jan 2024 – Present
InspironLabs Software Systems Private Limited

- Built reusable and loosely coupled UI components using **React.js** and **Material UI (MUI)** for scalable frontend development.
- Developed **AWS serverless backend services** using **Node.js**, **Serverless Framework**, and **GraphQL**.
- Integrated **PostgreSQL database engine** with **AWS RDS**, ensuring efficient data access and seamless frontend-backend integration.
- Collaborated in **Agile/Scrum environments** using **GitHub** for version control and **JIRA** for sprint planning and issue tracking.

PROJECTS

Honeywell - HQMR Apr 2024 – Feb 2025

An application used to manage the quality of an organization's products or services

- Designed and developed a React.js-based scheduling application for Honeywell's Quality Management Review process, automating business workflows and reducing manual planning efforts.
- Implemented **dynamic recurring date generation** using **Day.js**, based on user-defined tenure.
- Automated creation of multiple **QSMR schedule entries** by calculating review cycles within a specified date range.

Paramount Global (formerly ViacomCBS) - MIC Mar 2025 – Present

A media supply chain platform that provides operational overview of all active workorders and assets

- Developed an interactive dashboard for a media supply chain platform to monitor the real-time status of work orders and media assets.
- Built reusable and responsive UI components using **React.js** and **Material UI** to deliver a consistent user experience.
- Integrated **GraphQL APIs** to fetch, filter, and display work order and asset information with optimized data retrieval.

EDUCATION

Full-Stack Web Development (Full-time) May 2022 – Oct 2023
Masai School

Bachelor of Engineering (Mechanical) Apr 2017 – May 2020
JSPM Narhe Technical Campus

TRAININGS AND CERTIFICATIONS
